**CURRENT AND FUTURE STRATEGIES IN RADIOTHERAPY FOR SMALL-CELL
LUNG CANCER**

Journal of Clinical and Translational Research

Dear author(s),

Reviewers have submitted their critical appraisal of your paper. The reviewers' comments are appended below. Based on their comments and evaluation by the editorial board, your work was FOUND SUITABLE FOR PUBLICATION AFTER MINOR REVISION.

If you decide to revise the work, please itemize the reviewers' comments and provide a point-by-point response to every comment. An exemplary rebuttal letter can be found on at <http://www.jctres.com/en/author-guidelines/> under "Manuscript preparation." Also, please use the track changes function in the original document so that the reviewers can easily verify your responses.

Your revision is due by Jun 30, 2020.

To submit a revision, go to <https://www.editorialmanager.com/jctres/> and log in as an Author. You will see a menu item call Submission Needing Revision. You will find your submission record there.

Yours sincerely,

Felipe Couñago
Editorial Board Member

Reviewers' comments:

Reviewer #1: Please, review (and rewrite properly) page 7 last sentence grammar (lines 57 to 60)

Reviewer #2: Thank you for asking me to review the paper entitled "Current and future Strategies in Radiotherapy for Small-cell lung cancer"

Accepted with minor changes

First of all, there is a mistake in the title, you mean "strategies" and in the manuscript appears "stategies".

Generally speaking I admit I have enjoyed Reading this article. Nowadays it's a relevant topic. However there are some aspects that can be improved in your paper.

* In the section : Stage IIB - IIIC (T3-4, N0, M0; T1-4, N1-3, M0) You could mention several studies treating with dose-escalated hypofractionated RT and it's also relevant the clinical trial "A Randomized Phase II Study Comparing Two Schedules of Hyperfractionated Thoracic Radiotherapy in Limited Disease Small Cell Lung Cancer"

* You talk about SRS on page 7, line 60, so you must include SRS also in future directions again in the context of immunotherapy.

* Due to the length of the text, it would improve readability including some table (remarking the most relevant scientific literature)
